INTRODUCTION

Aspiring Software Engineer and Full Stack Developer with hands-on experience building production-ready web applications using the MERN Stack and Next.js. Strong foundation in RESTful API development, authentication, database design, AI integration, and cloud deployment. Passionate about problem solving, writing clean, scalable, and efficient code.

EDUCATION

Bachelor of Technology, Rajasthan Technical University, Kota

Sep 2023 – May 2027

B.Tech in Computer Science and Engineering

GPA: 7.7/10.0

EXPERIENCE

Data Analytics Intern

May 2026 – June 2026

Techak

- Completed a 45-day internship focused on **data analytics fundamentals**, working with real-world datasets to understand data collection, cleaning, and analysis workflows.
- Learned and applied **SQL, Microsoft Excel, and basic data visualization techniques** to generate meaningful insights.

Frontend Development Intern

June 2025 – July 2025

Proscon Automation Training & Institute

- Developed responsive frontend modules for the SAC RTU platform using Next.js and Tailwind CSS, supporting 15+ student clubs and event management.

PROJECTS

JobHouse | AI-Powered Job & Internship Platform [Demo](#)

June 2026

React.js, Redux, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Cloudinary, Groq API, Vercel, Render

- Developed a full-stack AI-powered job and internship platform, implementing **role-based authentication** for Students and Recruiters, **20+ RESTful APIs**, secure authorization, responsive UI, and **Cloudinary**-based resume storage.
- Engineered AI-driven recruitment features by integrating the **Groq API** to perform **resume analysis with ATS scoring**, generate personalized **resume feedback**, and automatically create **10 job-specific interview questions** from job descriptions, enabling candidates to evaluate and improve their applications before submission.
- Deployed production-ready full-stack applications using **Vercel** and **Render**, implementing scalable architecture, secure hosting, performance optimization, and reliable application availability.

UniTalk Chat Application | Backend [GitHub](#)

March 2026

Node.js, Express.js, MongoDB, JWT, Nodemailer

- Developed secure **RESTful APIs** for user authentication including signup and login flows, implementing **JSON Web Token (JWT)**-based stateless session management to ensure access control across the application.
- Implemented an **anonymous chat** feature with a **privacy-first architecture** where user identities remain hidden by default, with a controlled reveal mechanism that exposes identities only upon verified mutual connection.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript

Web Technologies: HTML5, CSS3

Frameworks / Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS

Database Management: MongoDB, MySQL

Deployment: Vercel, Render, Railway

Tools: Git, GitHub, Postman, Cloudinary, VS Code

AI Tools : ChatGPT, Claude AI, GitHub Copilot

Core: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS

- **AWS for Beginners** | Simplilearn SkillUp (**ID:** 10365894) Jun 2026
- **Java (Basic) Certification** HackerRank (**ID:** ADEA88A96ECA) 2025
- **NSS Volunteer** Actively contributed to social service initiatives and community outreach under NSS 2023-2025
